

# Shipping

## I ordered next day delivery will I receive product next day?

The turnaround time for shipping must be added to Admiral's [Turnaround Guidelines](#). We need to produce those items not in stock, pick, pack and ship the product and this takes time. Please see the [TURNAROUND GUIDELINES PDF](#) for more information on the time it will take to ship your order. After your product is produced, we will pack and then ship your product using UPS "Express Saver" from our factory in the Dominican Republic which usually takes 2 - 4 days to deliver throughout North America. "Express Saver" is a UPS term it does not mean you are paying more for express service this is just the name they give to their express saver shipping service. When you order on time in the MAIN order window these are the packing / shipping options via our fastest method i.e., UPS Express Saver.
